CONTEXT & DESCRIPTION : Kidneys may be best described as filters in our body. Rerenal Capsules facilitates kidneys to mainly filter and expel sodium and water. Essentials are retained in our body that are required and the unessentials are expelled out. There are many other acts kidneys do and they include, making of urine, remove waste and extra fluid from our blood, help control our blood pressure, make red blood cells, balance hormones, balance body chemicals & maintain healthy bones. Chronic renal failure is a progressive loss of kidney functions. The kidney attempts to compensate loss of kidney functions for renal damage by hyper filtration. Hyper filtration further results in loss of kidney functions.
