CONTEXT & DESCRIPTION : In today's hectic life, the incidence of diabetes is on the increase, not only in India but the world over. Scientists and researchers are doing their utmost to invent real effective medicine which can take care of this killing disease. As we know, for proper functioning of human body, energy is the requirement. The energy is derived from glucose. Ordinarily, body requires 80-100mg flow of glucose. More concentration of glucose proves alarming and gives rise to very many related medical complications. It has been observed that due to ignorance, in the initial stage, people do not seek medical advise for the first 6 months to as late as 4 to 5 years. One can understand the hazardous consequences as increased level of glucose can knockdown the patient to coma besides causing Paralysis and or kidney failure.

INDICATIONS : Effective in treating type-I Diabetes (insulin dependant Diabetes mellitus) and type-II Diabetes (Non-insulin dependant Diabetes mellitus) It supplement's energy in diabetic patients.
